

**ACHIEVING  
MORE TOGETHER**

mastering space and time

A lot has been happening at bott. We have gained new expertise and continue to develop our solutions so that we can offer our customers one of the most comprehensive and powerful portfolios of van racking, workspace storage and workstation systems - all from a single source. Our primary goal remains the same:

# Our job is to make your job better, easier and more efficient.

At bott, we have made it our mission to go beyond simply manufacturing vehicle and workplace equipment. We take a close look at our customers' working environments and develop concepts that add real value. From the initial planning stage, our specialists can identify unused potential for new workplaces and transform it into additional usable space. We also optimise daily workflows to avoid unnecessary movement – saving both time and effort.

We call this **mastering space and time**. And our customers can only benefit from it.

## Four strong divisions with one goal: **perfection in space and time**

All of bott's expertise is now structured across four business divisions. These divisions are closely connected so that we can provide you with professional, solution-oriented advice and support at all times.

## Assembly Workstation and Testing Solutions

Material Flow  
Manual production assembly

Service and Maintenance / Maintenance services  
Documentation and analysis

## Vehicle Conversion Solutions

Trade  
Maintenance services  
Public sector

## Workspace and Storage Solutions

Workspace for tradespeople  
Maintenance & repair workshop  
Public sectors  
Training workshop

# About bott: Expertise, solutions and global reach

The Bott Group develops and manufactures van racking equipment, workplace storage and workstation systems at five European locations. With a broad portfolio – ranging from modular workspace storage and flexible workstation systems for electrical laboratories, development and manual assembly to test systems, measurement and testing technology and software – bott supports companies worldwide in designing work processes that are efficient, ergonomic and future-proof.

bott's headquarters are located in Gaildorf (Germany), with additional production sites in Crailsheim (Germany), the United Kingdom and Hungary. With sales companies in several European

countries and partners and importers worldwide, bott offers a nationwide service network that ensures planning, implementation and integration from a single source.

Combining decades of experience in workspaces and van racking equipment with state-of-the-art technology for production and testing environments, bott is now a leading international partner for customised workstation and manufacturing concepts and solutions.

**If you have any questions about bott, our divisions or specific products, please speak to your local bott sales representative.** You can also find out more at [www.bott.de](http://www.bott.de).
